2 About certification of necessity of childcare

(1) What is the accreditation system?

In the "New Child and Childcare Support System" that came into effect in April 2015, a "benefit system" was introduced to guarantee the education and childcare of preschool children. In order to receive this "benefit system", if you wish to use a nursery school / certified child institution, you need to obtain education / childcare benefit certification in your municipality. In Chiba City, the application procedure for education and childcare salary certification will be carried out at the same time as the application procedure for use of nursery schools and certified childcare centers.

However, if you wish to use only the daytime education hours (education certification) among the certified children's institutes, the method of applying for education / childcare salary certification is different, so certified children who wish to use it directly Please check with the garden.

(2) Types of education / childcare benefit certification

▽ There are three certification categories depending on the age of the child and the need for childcare.

The need for childcare	Certification category	Target child	Main gardens available
can be	No. 3 certification (childcare certification) [Standard time for childcare / Short time for childcare]	For parents' labor and illness under 3 years old More children in need of childcare	<ul style="list-style-type: none"> ·nursery school · Certified child institution (childcare certification frame) · Community-based childcare business

none (You can apply even if there is "Yes")	No. 1 certification (Education certification)	Preschool children over 3 years old (Excluding No. 2 certification) * The month of use varies depending on the garden.	<ul style="list-style-type: none"> · Certified child institution (education certification frame) · Kindergarten (only for kindergartens covered by the benefit system)

* For the target gardens in Chiba City, Please see "List of nursery schools and certified children's schools".

(3) Classification according to the required amount of childcare (available time)

Those who receive No. 2 or No. 3 certification are either "Standard time for childcare certification" or "Short-time childcare certification" depending on the time required for childcare (including travel time due to parents' commuting, school, nursing care, etc.). The certification categories are divided into two. Depending on the classification, the hours that you can use the nursery school, certified child institution, etc. in one day will differ.

The classification will be determined based on the "documents certifying the need for childcare (working certificate, etc.)" submitted. If multiple reasons are combined to reach the standard time for childcare, it is necessary to attach a document certifying that childcare is necessary for each reason.

In addition, the certified childcare requirement is set as the maximum limit that can be used, and in principle, it cannot be used for any reason other than the approved reason. From the viewpoint of consideration for raising children, etc. **Please use it during the time when childcare is required...**

▽ Childcare time

Childcare standard time certification ... 6 days a week (Monday-Saturday) 11 hours a day

Childcare short-time certification ... 6 days a week (Monday-Saturday) 8 hours a day

* Saturday childcare and available hours vary depending on the kindergarten, so please check with each kindergarten.
